

Brownfields 2018 Assessment Grant Fact Sheet

Tulsa, OK

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. The Small Business Liability Relief and Brownfields Revitalization Act of 2002, as amended by the Brownfields Utilization, Investment, and Local Development Act of 2018, was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$171,500 for hazardous substances

\$128,500 for petroleum

EPA has selected the City of Tulsa for two brownfields assessment grants. Community-wide hazardous substances grant funds will be used to conduct six Phase I and four Phase II environmental site assessments, and prepare a cleanup plan. Community-wide petroleum grant funds will be used to conduct the same tasks at sites with potential petroleum contamination. Grant funds of both types also will be used to support community outreach activities. Assessment activities will focus on the Route 66 corridor.
